

SURVEY ON FREE TRADE AGREEMENTS

INTRODUCTION

This publication provides information about free trade agreements (hereinafter referred to as "FTAs") and their importance vis-à-vis the Harmonized System. This survey is focused on providing some information on FTAs and Customs Unions currently in force (based on WTO information sources and only included the regional trade agreements for which the WTO was notified as being Free Trade Agreements or Customs Unions and in force as of 20 May 2008) and the share of imports from FTA and Customs Union countries in world trade. For the purposes of this survey, countries mean members of the FTAs and Customs Unions, including territories. For convenience of analysis, "shares of imports from FTA and Customs Union countries" were computed based on trade statistics from the "Direction of Trade Statistics Yearbook 2007" published by the International Monetary Fund. The survey was limited to trade in goods only.

Annex I to this publication provides some information on FTAs and Customs Unions such as the number of members of the agreements, names of member countries, date of entry into force and types of agreements. This survey is based on WTO information sources (www.wto.org), and it only includes the regional trade agreements for which the WTO was notified, as being Free Trade Agreements or Customs unions and in force as of 20 May 2008. Among the 132 FTAs and Customs Unions listed, about 55 % (68 FTAs and 4 Customs Unions) was established among or with European countries including the EC, EFTA and/or CIS countries.

Annex II reveals trade information for 178 countries that had FTAs and Customs Unions as of 31 December 2006. About 43 % of the world's total imports (US\$ 12,353 billion) occurred among FTA and Customs Union member countries. Almost half (44 %) of total imports (US\$ 12,075.6 billion) occurred among FTA and Customs Unions member countries. In the case of European countries, over 60 % of the European countries' total imports (US\$ 5,443.4 billion) came from FTA and Customs Union member countries.

Annex III shows the distribution of country groups with different levels of shares of imports from FTA and Customs Union member countries in terms of total import value in the year 2006. In the case of 25 countries, more than 70 % of the total import value came from FTA and Customs Union member countries. For 53 countries, over 50 % of total imports came from FTA and Customs Union member countries.
